FOR IMMEDIATE RELEASE

Municipality Requests Water Conservation Following September 26 Water System Event

Town of Englehart, Ontario | October 8, 2026

The Municipality is asking all residents to voluntarily conserve water following an event that occurred on September 26, 2026, which has resulted in a limited water supply and reduced capacity within the municipal well system.

Since the event, municipal staff have been closely monitoring the water system and taking measures to maintain service and ensure an adequate supply of water for essential household use, fire protection, and emergency response needs.

As a precaution, residents are requested to reduce water consumption and avoid all non-essential water use until further notice.

The cooperation of residents is critical in helping to reduce demand on the water system while the Municipality continues to manage the situation and evaluate long-term solutions.

We appreciate the patience and understanding of our residents as we work through these challenges. Water conservation efforts by everyone will help ensure that essential services can continue to be maintained throughout the community.

The Municipality will continue to provide updates as additional information becomes available.
